SUMMARY

Aspiring Full Stack Developer with strong foundations in software engineering, web development, and problem-solving. Experienced in building real-world projects using Python, machine learning, and web technologies. Passionate about developing scalable solutions and continuously improving technical expertise.

EDUCATION

B.E CSE [Specialization in Blockchain] Dr. N.G.P Institute of Technology, Coimbatore	2023 - 2027
■ CGPA : 8/10 (till 5 th semester)	
Higher Secondary Education Victory Vidhyalaya Matric Higher Secondary School, Coimbatore	Completed 2023

PROJECTS

AI Powered Leaf Disease Detection and Smart Advisory System ■ Developed an image processing system using Python, OpenCV, and TensorFlow to detect plant diseases. ■ Achieved high accuracy in disease classification through machine learning techniques. Technologies Used: Python, OpenCV, TensorFlow, Gemini AI	2025 - Present
Code Logic Validator (In Development) ■ Building an AI agent that evaluates a beginner's problem solving logic written in plain text, without an actual code solution. ■ Utilizes LLM-based orchestration for access correctness, provides targeted hints, and guides learners through reasoning steps autonomously. Technologies Used: Java, LLM APIs, Prompt Engineering	2025 - Present
Contextkey Logging ■ Simulated keylogging techniques in controlled environments to identify vulnerabilities. ■ Designed detection and mitigation strategies using SIEM and EDR tools. Technologies Used: Python, Windows API, SIEM/EDR Tools	2023 - 2024

TECHNICAL SKILLS

Languages - Java, Python, C (Basics)

Scripting Language - JavaScript, React.js

Web - HTML, CSS

Database - SQL, SQLite, MongoDB (Basics)

INTERNSHIP

Generative AI, LLM's and Its Prototyping

JUNE - 2025

Gateway Software Solutions, Coimbatore (On-Site)

- Worked on fine-tuning large language models (LLMs) for domain-specific tasks such as summarization, Q&A, or chatbot development.
- Built and deployed prototypes demonstrating real-world applications of generative AI, such as content creation, code generation, or image captioning.

Web Development

2025

CodSoft (Remote)

- Developed multiple responsive web projects using HTML, CSS, JavaScript.
- Gained hands-on experience in deploying projects using platforms like GitHub Pages.

CERTIFICATIONS

- Gen AI, LLM and Prototyping, June 2025
- NPTEL - Cloud Computing, May 2025
- NPTEL - Introduction to Internet of Things, April 2026

SOFT SKILLS

● Teamwork ● Leadership ● Time Management ● Critical Thinking ● Effective Communication

AREA OF INTEREST

- Full Stack Development (MERN)
- Database Management Systems
- Machine Learning
- UI / UX Design

LANGUAGE KNOWN

- English
- Tamil
